## Current Research

### Community Cellular Networks

Investigating small-scale, locally owned cellular networks. Assisted in the development of open-source SDR-based solutions, including OpenBTS, Osmocom, OpenAirInterface, and Open5GS. Extended the platforms to support integration with telecoms as well as distributed operation. Deployments in Indonesia, Philippines, and Mexico. Future deployments planned in Tacoma, Canada, and Peru.

### Ecological Sustainability

Working with the Ol Pejeta conservancy to build text-based tools for community engagement. Deployments ongoing.

### Data Science for Social Good

Partnering with Grab Holdings, the largest ride-sharing company in South-East Asia to explore the use of their platform to positively impact marginalized populations in covered countries.

### Network Security

Exploring uptake of secure messaging in “the long tail” of the Internet.
