## Interests

My research builds community-based systems for rural areas, with a specific focus on networking.

## Academic

<b>University of Washington</b> Assistant Professor Computer Networks and ICTD	2016
<b>University of California, Berkeley</b> Postdoctoral Researcher Advisors: Eric Brewer and Tapan Parikh	2014
<b>University of California, Berkeley</b> Doctor of Philosophy, Computer Science Thesis: <i>Community Cellular Networks</i> Advisors: Eric Brewer and Tapan Parikh	2013
<b>University of California, Berkeley</b> Master of Science, Computer Science Thesis: <i>Metamouse: Improving Sharing of Existing Educational Applications</i>	2009
<b>University of Washington</b> Bachelor of Science, Computer Engineering (Magna Cum Laude)	2007

## Current Research

### Community Cellular Networks

Investigating small-scale, locally owned cellular networks. Developed extensions to OpenBTS and OpenAirInterface to enable more local content in network. Conducted longitudinal deployment of both technologies in rural Papua, Indonesia and Aurora, Philippines. Demonstrated sustainability of locally-owned cellular in Papuan context, as well as value to local community. Study and deployments ongoing.

### Digital Financial Services

As part of a grant from the Gates foundation, we have begun a number of studies focused on improving access to financial services among the underbanked. My focus has been on the security and efficacy of Internet-like services such as the Interledger Protocol.

### Ecological Sustainability

Ongoing research into the use of community sensing devices for resilience in Arctic communities.
