Current Research

Community Cellular Networks

Investigating small-scale, locally owned cellular networks. Developed extensions to OpenBTS and OpenAirInterface to enable more local content in network. Conducted longitudinal deployment of both technologies in rural Papua, Indonesia and Aurora, Philippines. Demonstrated sustainability of locally-owned cellular in Papuan context, as well as value to local community. Study and deployments ongoing.

Digital Financial Services

As part of a grant from the Gates foundation, we have begun a number of studies focused on improving access to financial services among the underbanked. My focus has been on the security and efficacy of Internet-like services such as the Interledger Protocol.

Ecological Sustainability

Ongoing research into the use of community sensing devices for resilience in Arctic communities.
